Forecast for Thursday 30 May 2024

Weather: A rather cloudy start to the day with patchy light rain on northern upslopes gradually clearing during the morning, with some sunny spells developing, mainly in the south of the Park. Perhaps some isolated light showers in the afternoon but easing later in the day. Windy.

Chance of cloud-free hill tops above 800m: 20% in the morning, becoming 40% in the north by the afternoon and 70% in the south.

Low Cloud and visibility: Areas of cloud covering hills above 400-600m in the morning. By the afternoon, cloud bases will lift and break to see some sunny spells with bases lifting to near the higher summits. Perhaps some lower cloud bases grazing the hills above 600m in the north. Mostly very good visibility, becoming moderate or poor in rain and very poor in low cloud covering the hills.

Meteorologist's View

A day for layers, including waterproofs. Brightening conditions in the afternoon may bring moderate UV levels, so consider sun protection. Feeling chilly on the higher summits.

Forecast for Friday 31 May 2024

Weather: Any mist or low cloud at first lifting and clearing to bring a fine, dry day with plenty of sunshine. The risk of strong sunlight is high.

Maximum wind: Northerly 15-20 mph gusting 30-35mph.

Chance of cloud-free hill tops above 800m: 30% at dawn, becoming greater than 95% during the morning.

Low Cloud and visibility: Cloud bases down to 300m at first, this clearing during the morning to see small amounts of cloud, with the bases all well above the summits.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 15 Celsius.
At 800m: Plus 7 Celsius.
Freezing level: Above summits.
